

## National experience and challenges faced with intermodal transport document digitalization

WP.24

Lucas Lagier, Senior Manager, TIR & Transit, IRU

17 October 2022

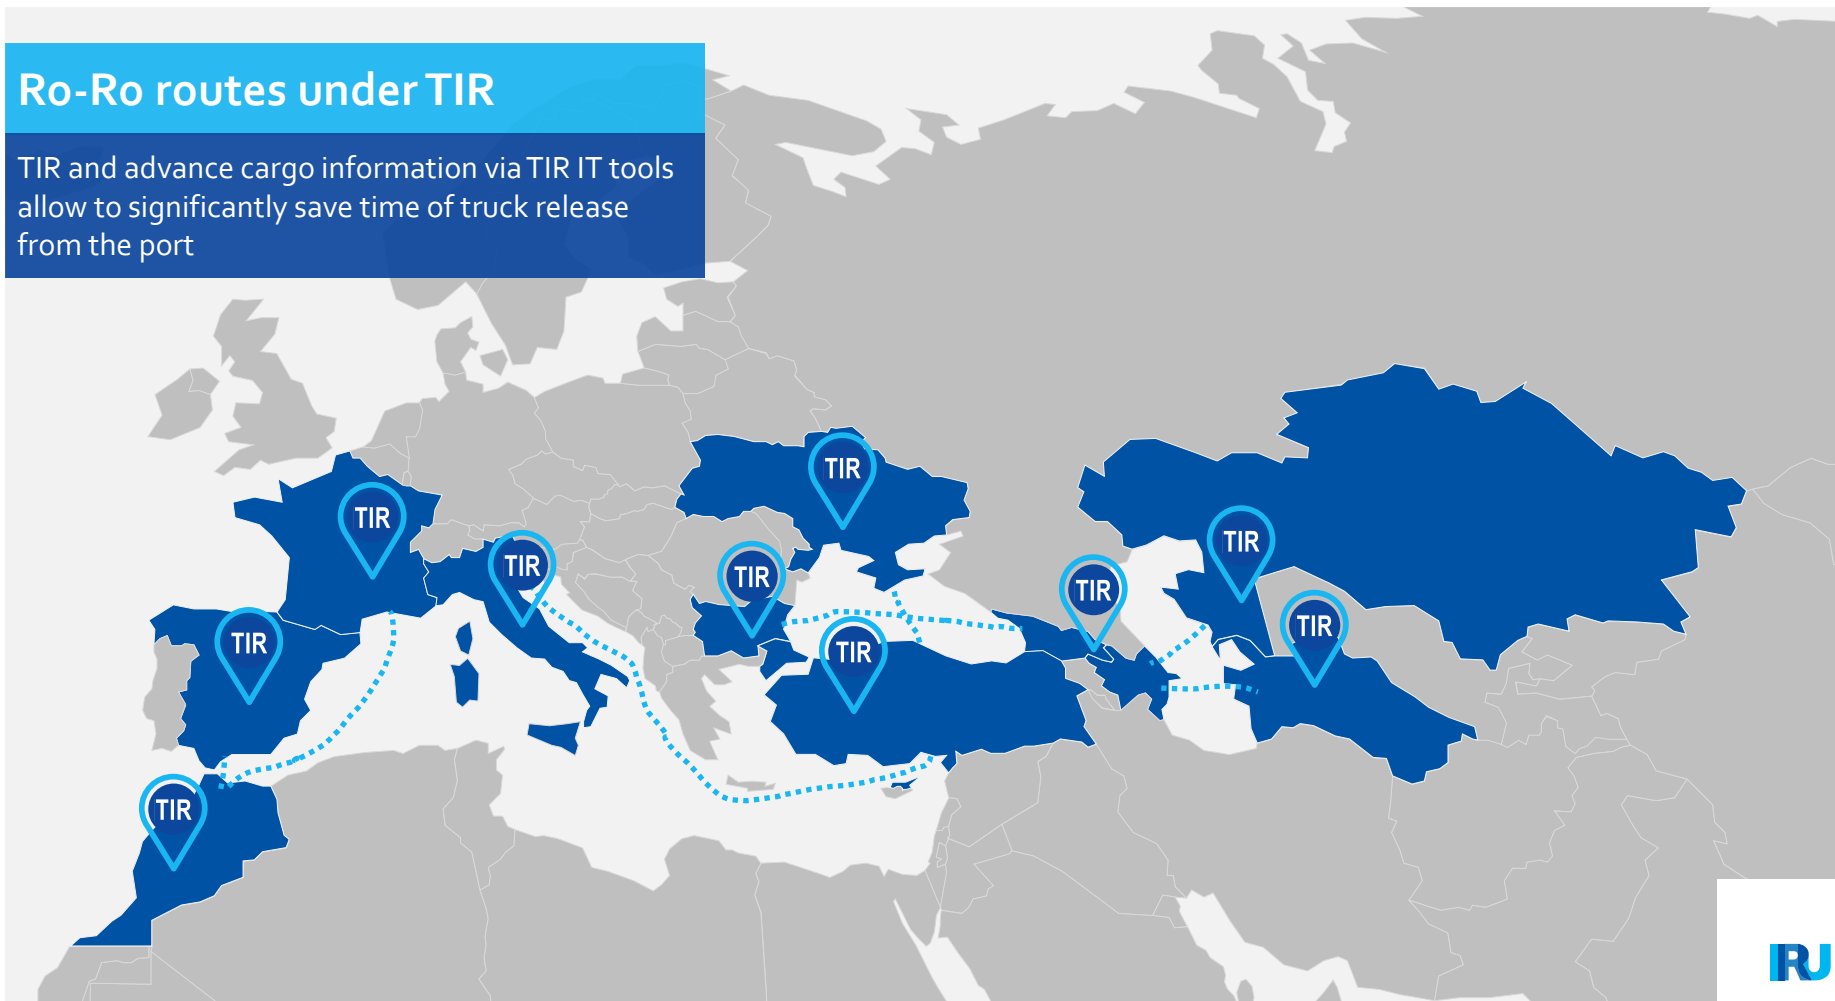

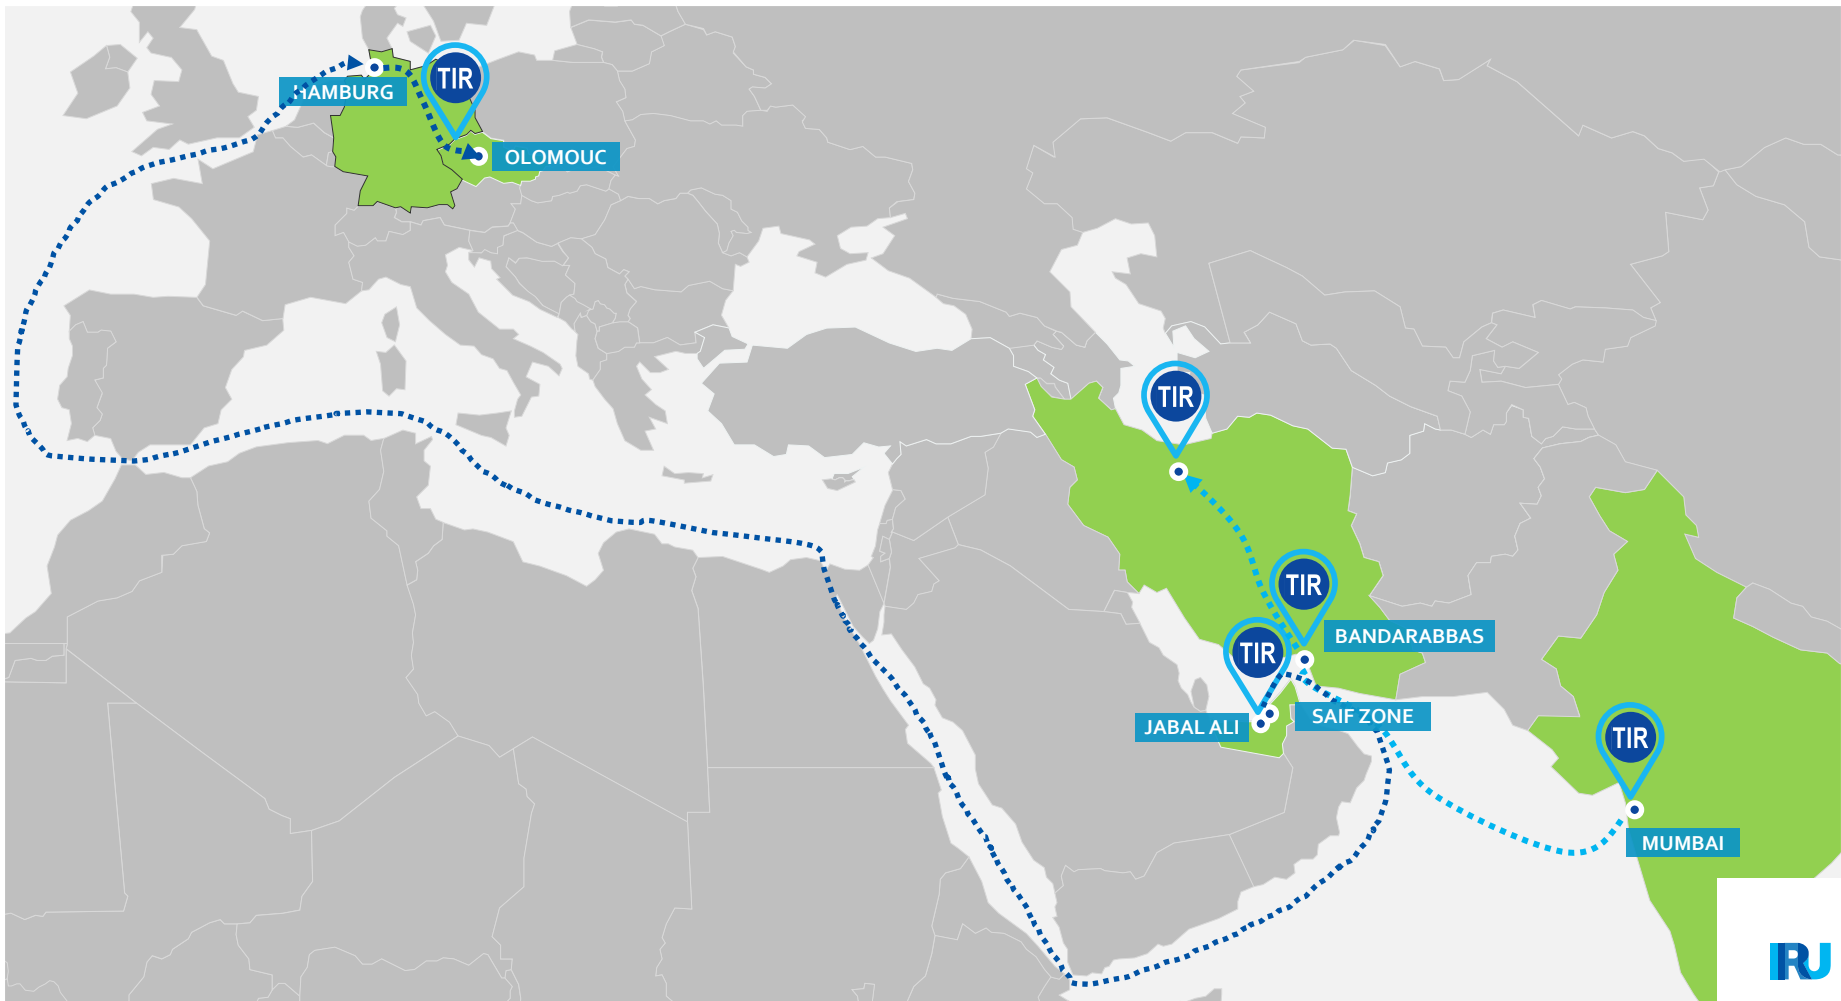

TIR Convention allows for intermodal transport of goods provided that at least one leg of the journey is carried out by road

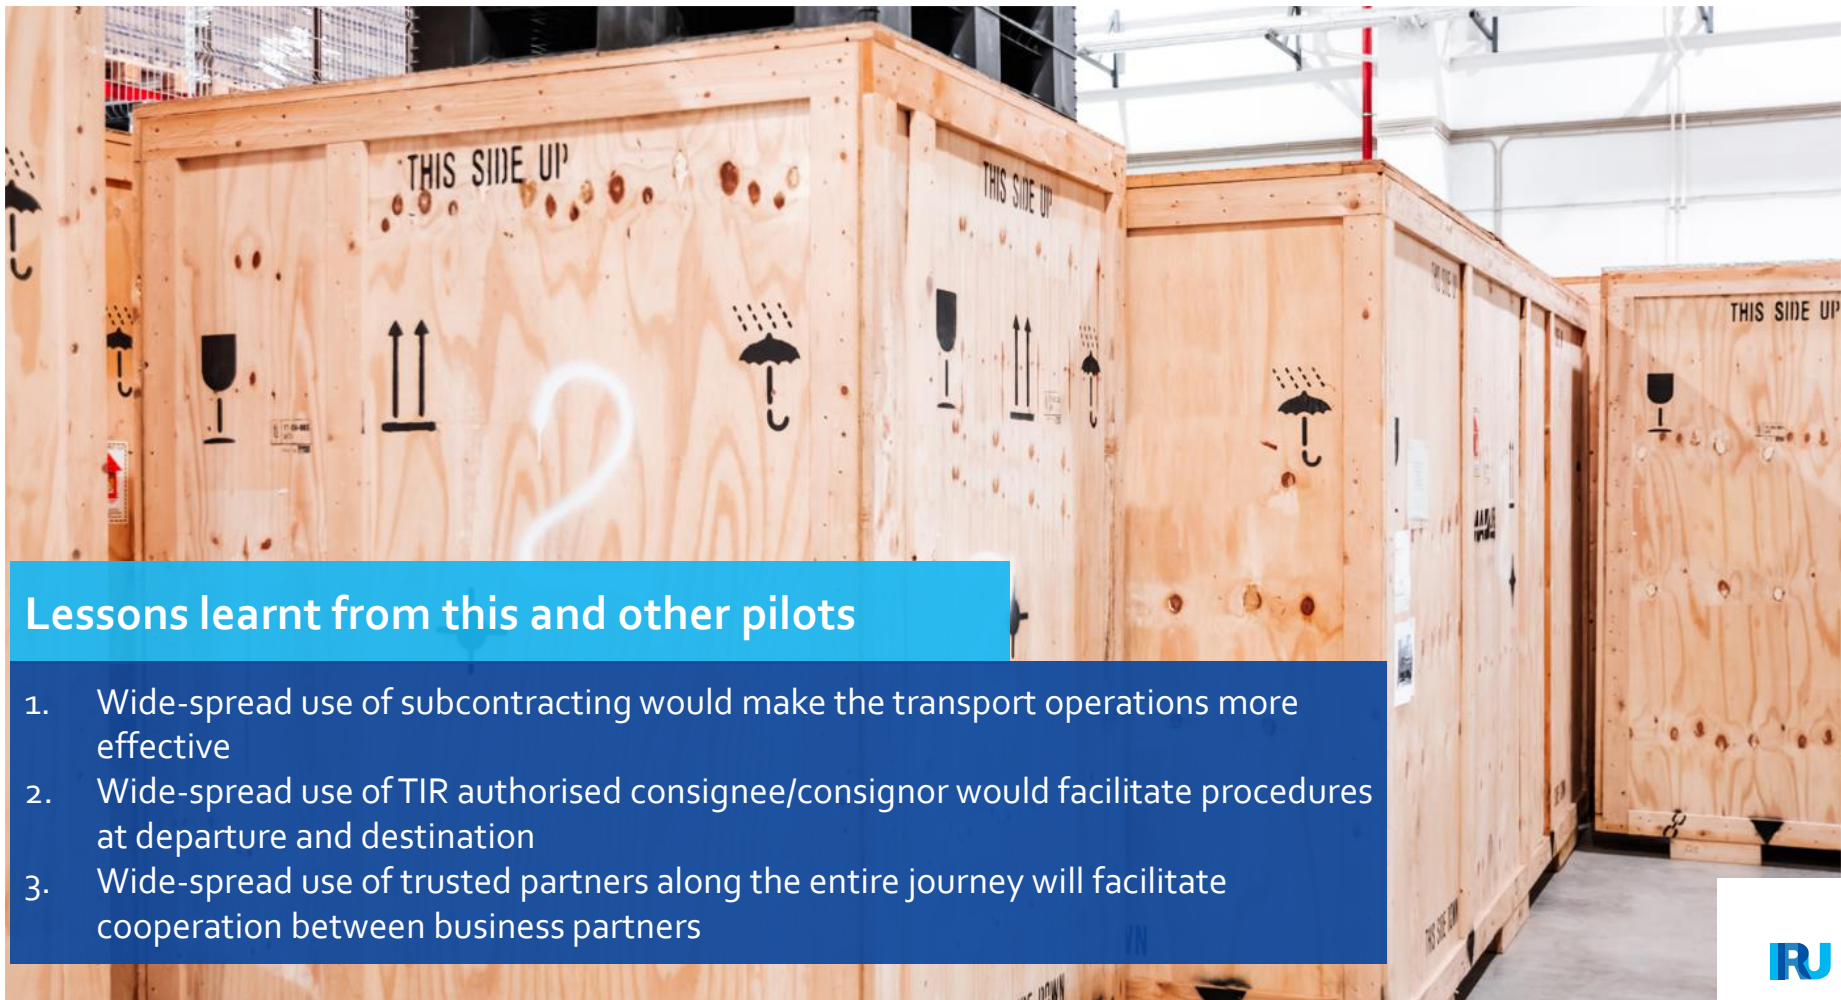

## Ro-Ro routes under TIR

TIR and advance cargo information via TIR IT tools allow to significantly save time of truck release from the port

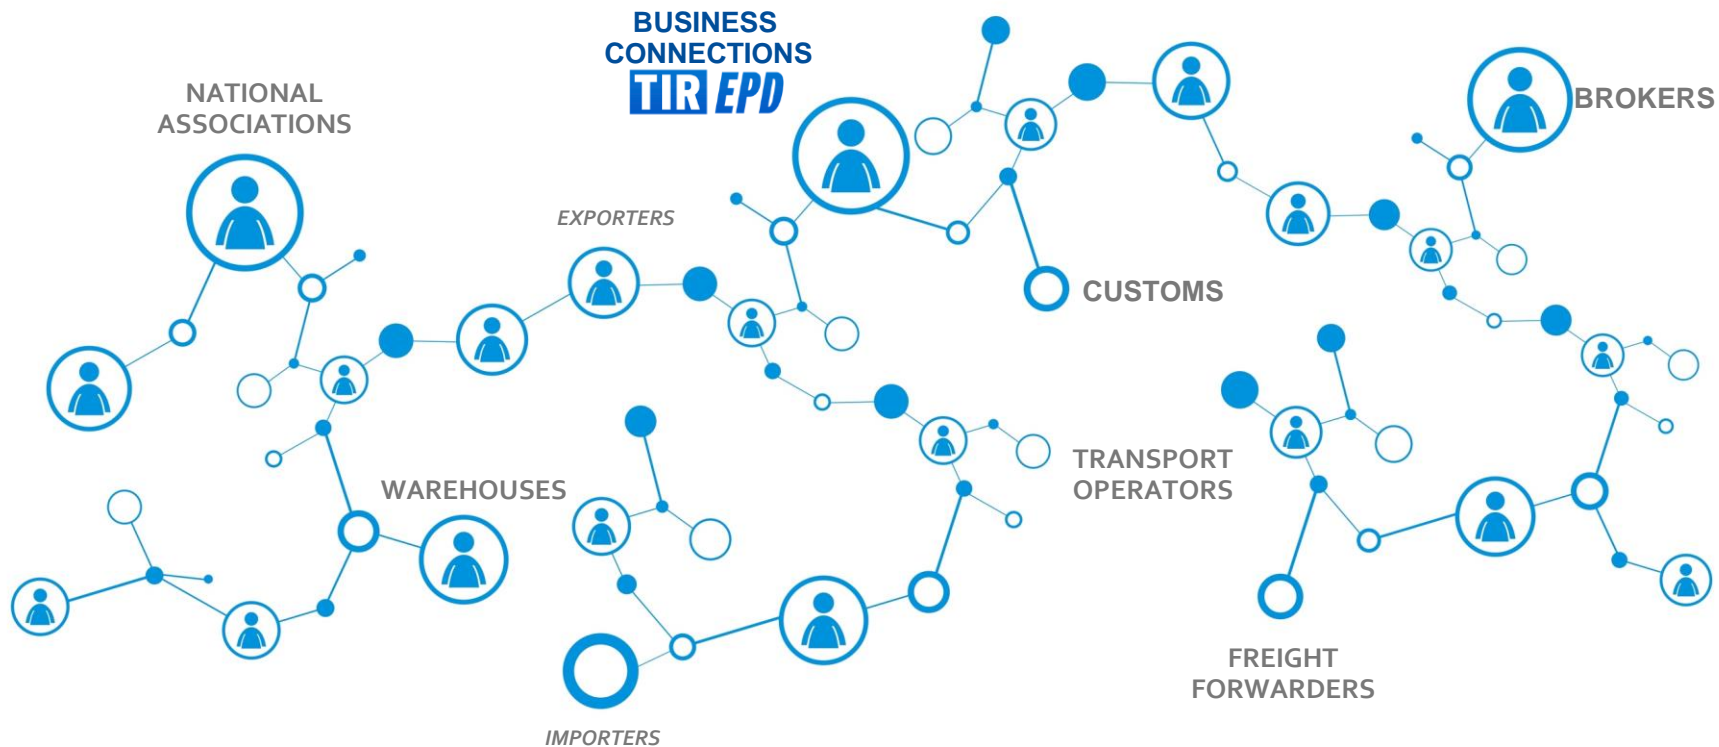

## Lessons learnt from this and other pilots

1. Wide-spread use of subcontracting would make the transport operations more effective
2. Wide-spread use of TIR authorised consignee/consignor would facilitate procedures at departure and destination
3. Wide-spread use of trusted partners along the entire journey will facilitate cooperation between business partners

## Business Connections structure

How it started...

What we added...

What we are working on, in order to provide services...

Next steps...

# GOALS AND BENEFITS

For transport operators and for logistic operators

More business opportunities

Trusted network of partners

Transparency and visibility

Efficient planning of complicated transports

Assistance when and where needed

## Network of trusted partners

Connection with customs in each TIR country

# Transport operators' data

**Business Connections – a new feature in TIR-EPD!**

By completing and publishing your Profile you will open the information to third parties and for a TIR transport operator for business purposes.

With the Business Connections feature you will get:

- The possibility to increase your business opportunities thanks to the visibility provided
- The possibility to partner with other TIR operators (e.g. in order to overcome various COVID-19).
